MANUAL MODE (Time counting + Weighing)

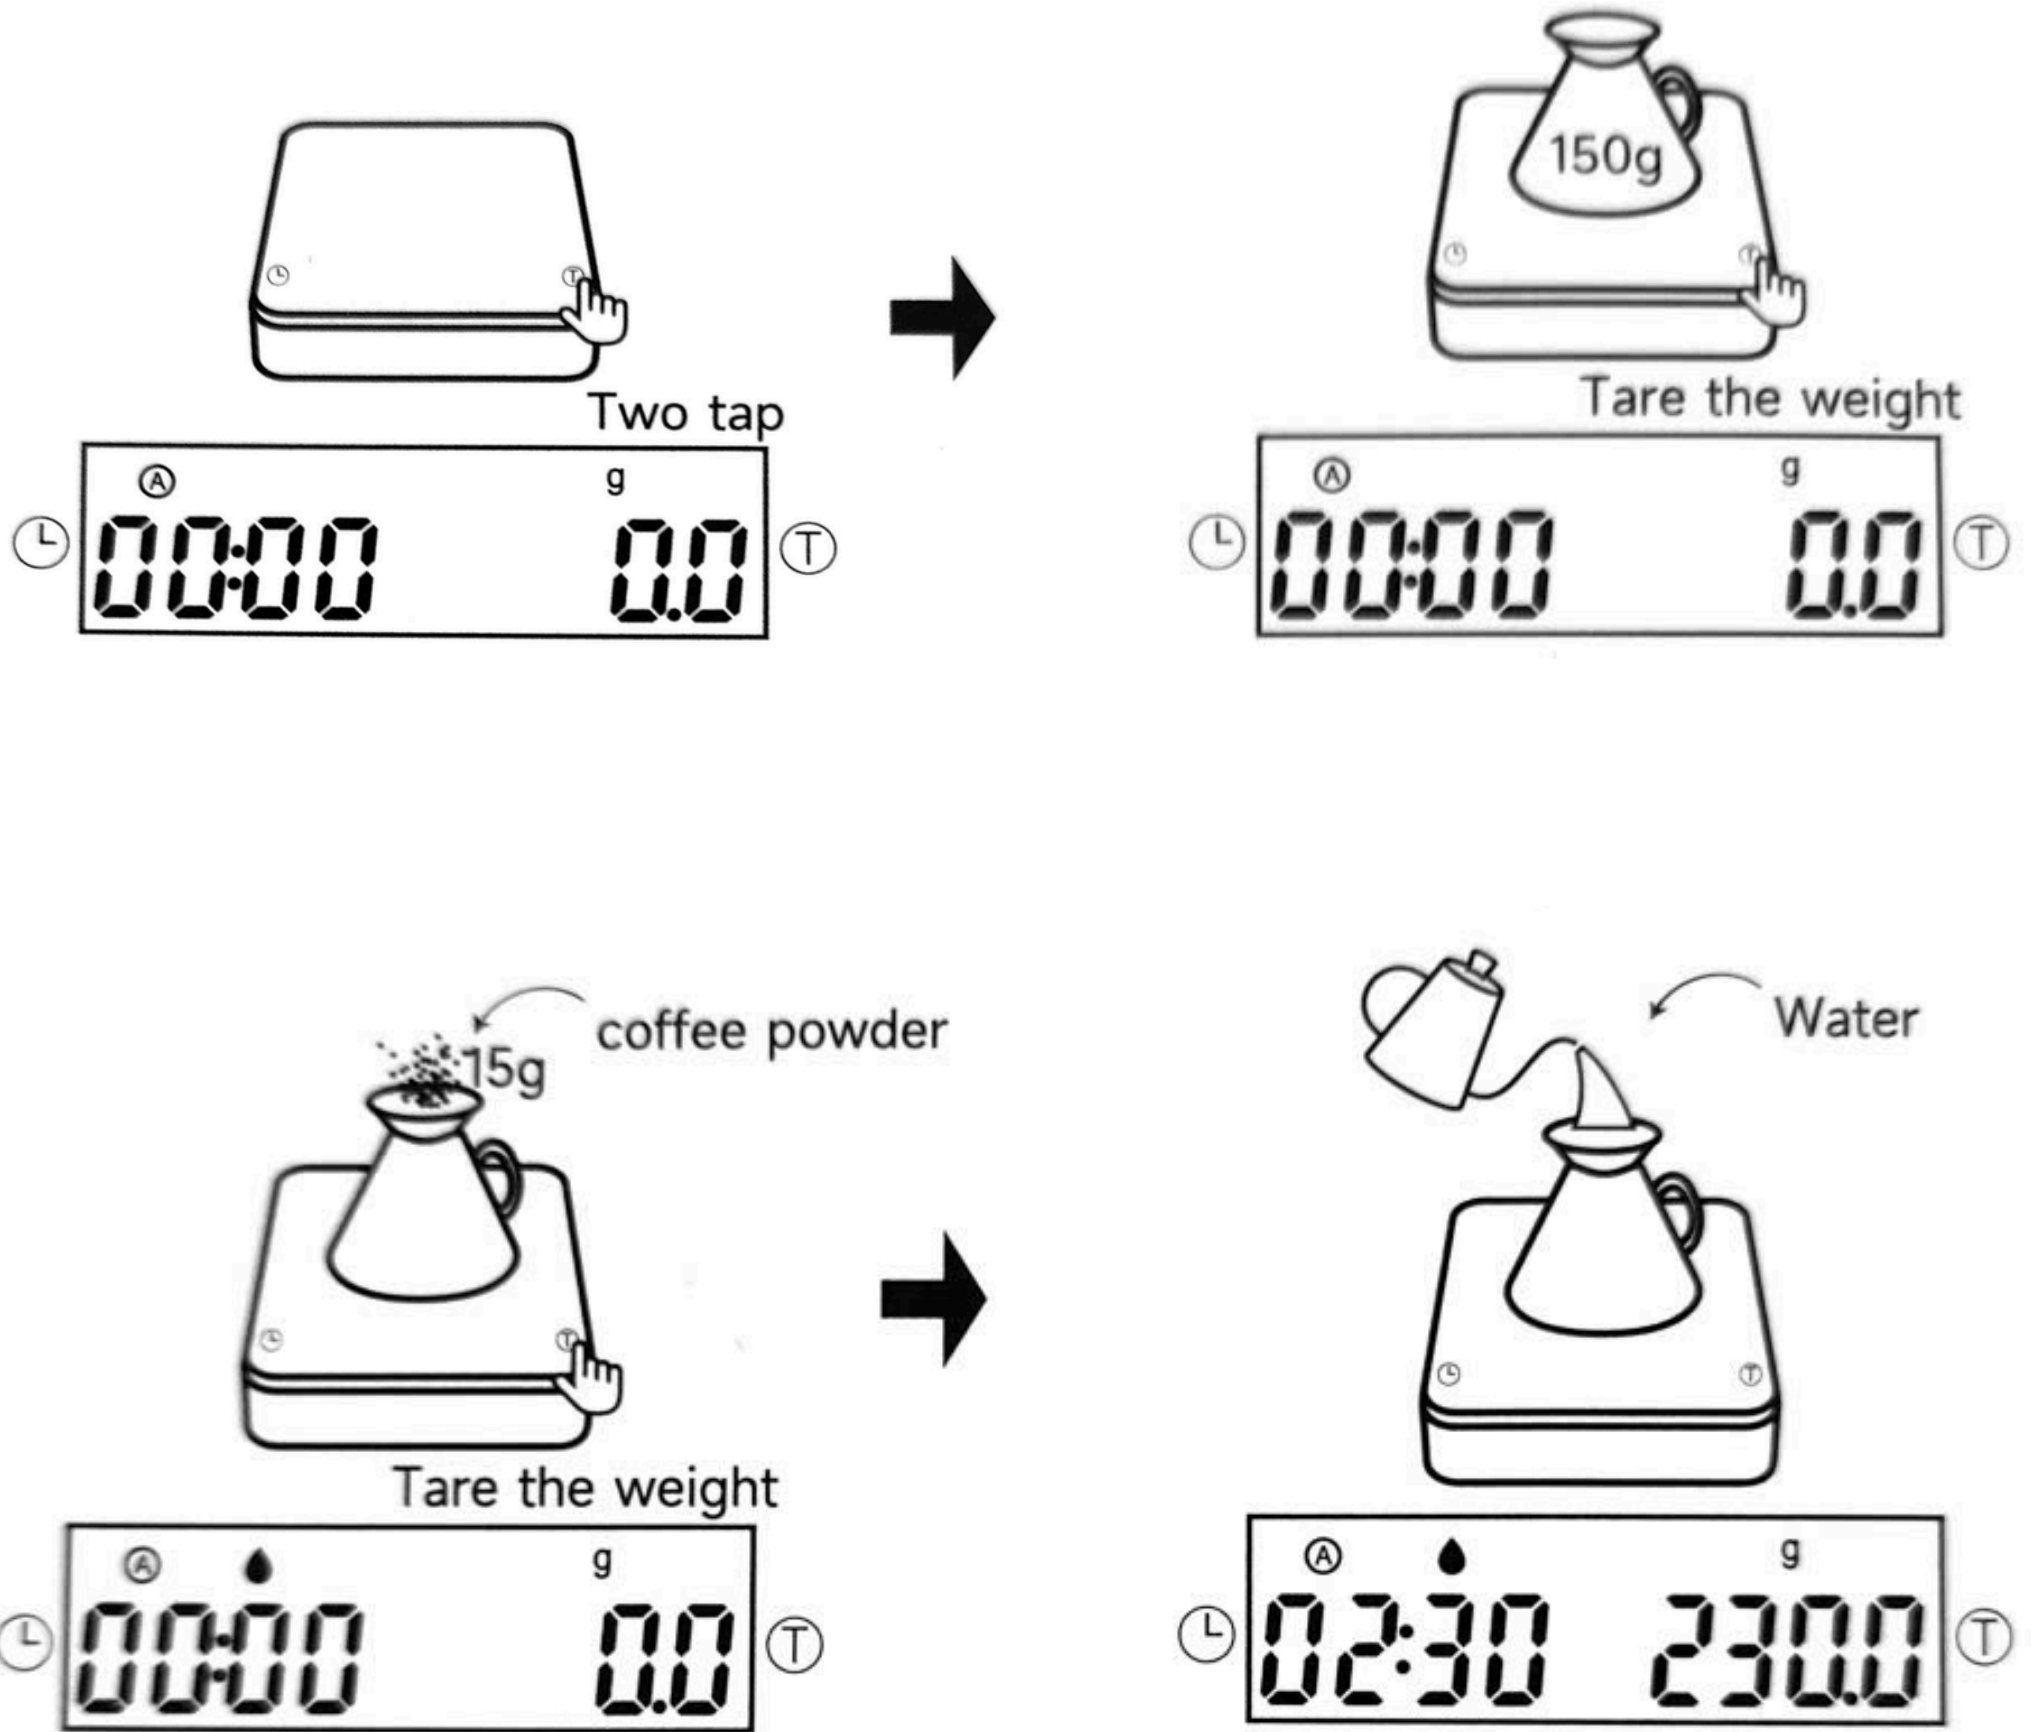

Short touch  to start/stop Timer, long touch for 2 SECONDS to clear Timer. The Timer maximum is 99'59".

Tips: Short-touch twice the  key to switch using modes. (Manual mode, Auto mode, Brew Ratio mode and Water flow speed mode)

Place the coffee kettle on the scale, press the  key to tare the weight.

Auto Mode (Time counting + Weighing)

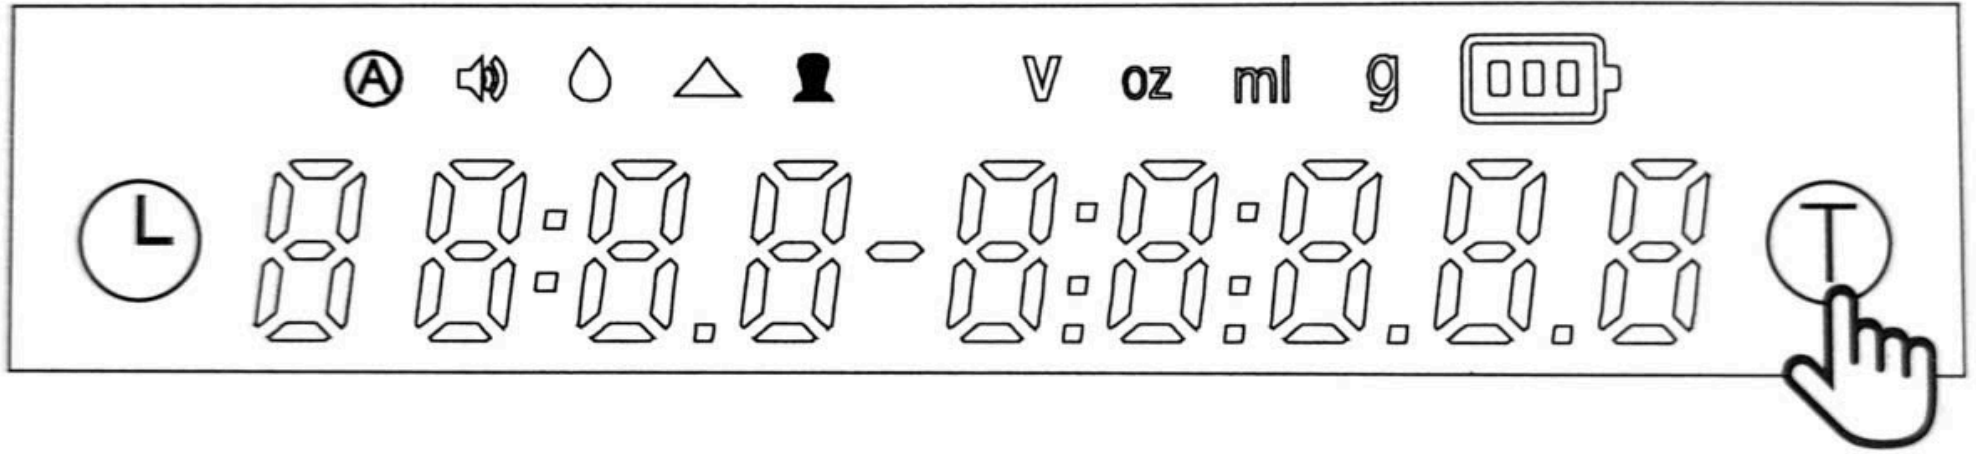

Step 1: Short touch TWICE (T) to get into Auto mode. After the icon (A) light up, the Auto mode is on.

Step 2: Put the kettle/filter on the scale, then touch (T) to clear the weight.

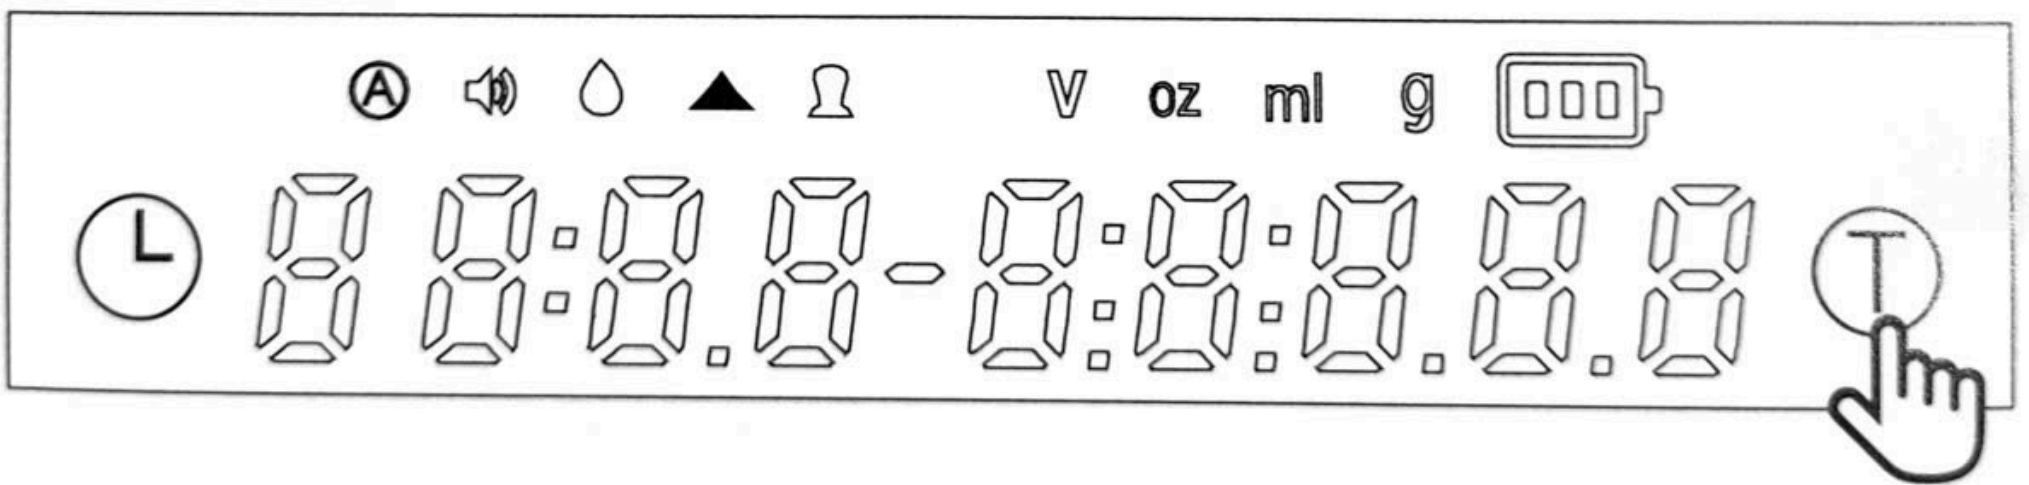

Step 3: Add coffee powder, then short touch (L), the icon “” will light up.

Step 4: Pour the water in, the timer will work automatically. If you stop pouring the water, the timer will continue running until you take all object off the scale.

Brew Ratio Mode

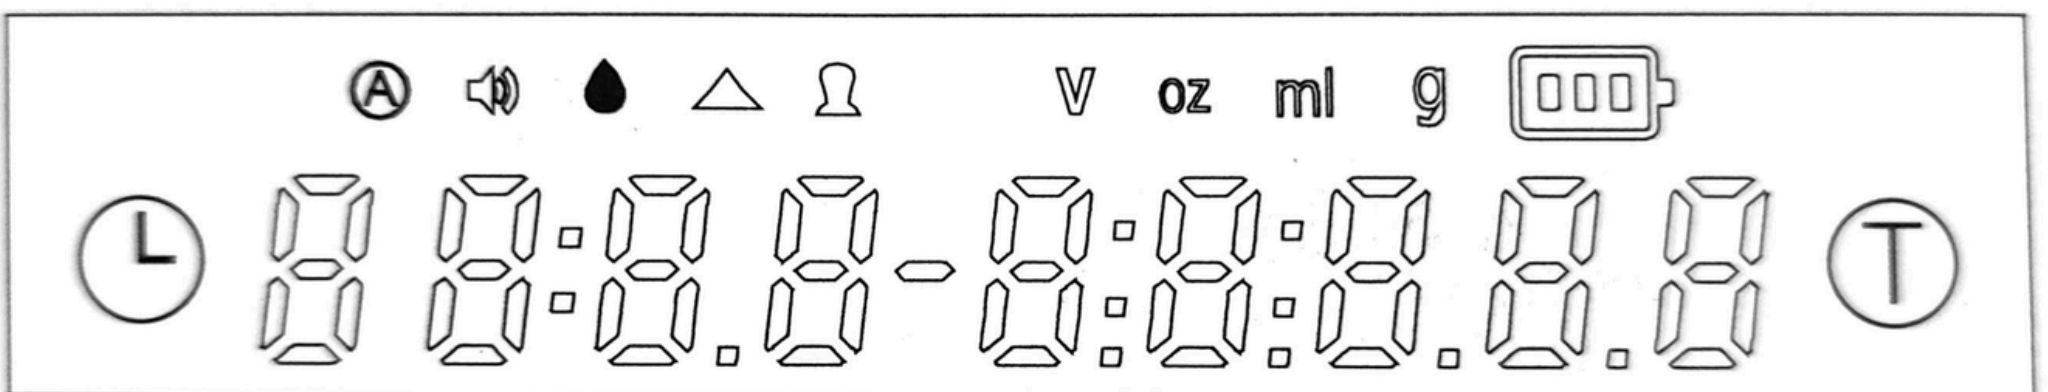

1. Short touch the  key TWICE to get into the Brew Ratio Mode (When in Auto Mode), and the icon  will light up

2. Put the kettle/cup on the scale, then short touch the  key to tare the weight.

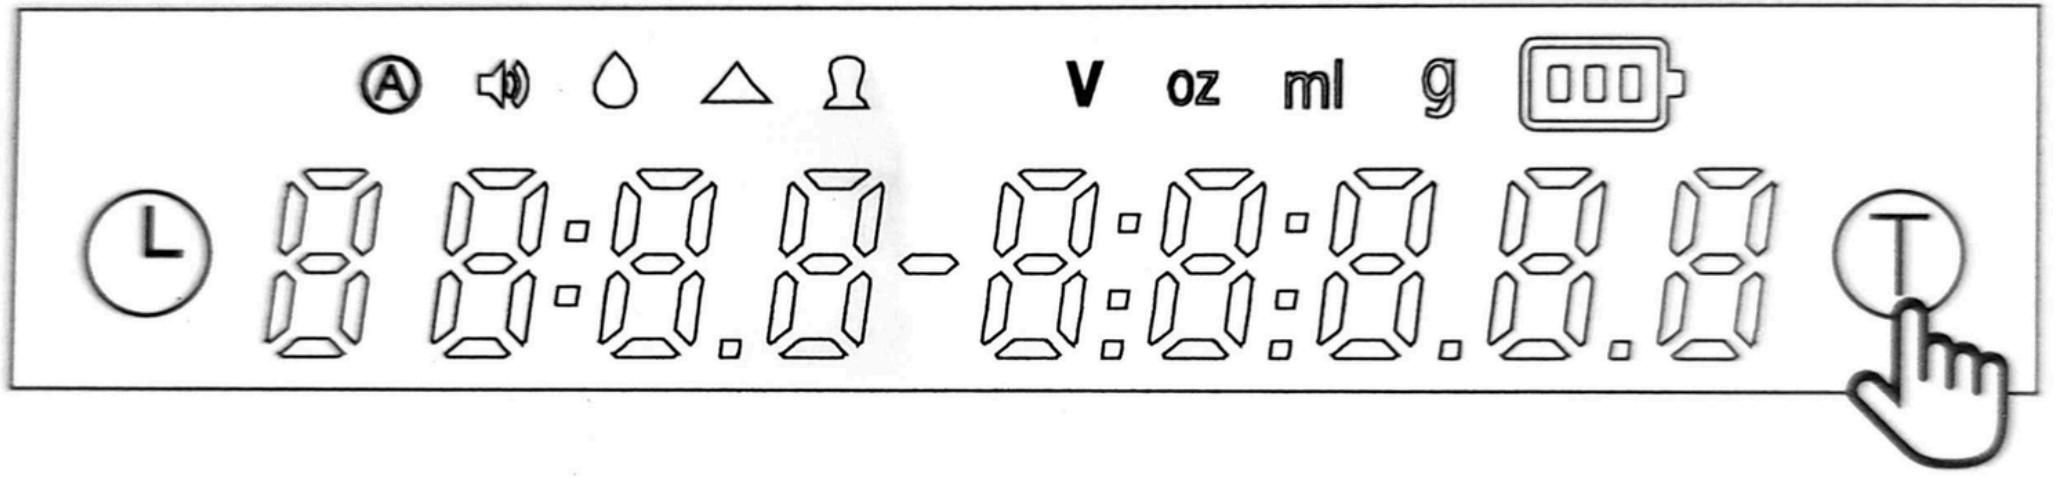

3. Add coffee powder, then short touch the  key. The icon “” will light up and the Brew Ratio (1:0.0) will display on the screen. (1 refers to coffee powder, 0.0 refers to water). The powder weight will also be back to zero.

4. Pour the water in. The icon  will flash until you stop pouring water. The Brew Ratio will be displayed on the right side of the screen. Time will be displayed on the left side of the screen. When you stop pouring the water, the icon  will stop flashing. The display will alternately show time, brew ratio, powder weight and water weight. These values are automatically cleared after being displayed three times.

5. ATTENTION: The object weight cannot exceed 999 grams, or the screen will flash once and beep.

Water Flow Speed Mode

1. Short touch the  key TWICE to get into Water Flow Speed Mode (when in brew ratio mode). The icon **V** will flash when in Water Flow Speed Mode.
2. Put kettle and coffee powder on the scale, then short touch the  key to tare the weight.
3. Short touch the  key TWICE to switch the unit to ml/oz/g.
4. Pour the water in. The water flow speed will be displayed on the right side of the screen. Time will be displayed on the left side of the screen. When you stop pouring water, the timer will continue counting until the kettle is removed from the scale. If needed, you can short-touch the  key to get the mode ready again.

Warning

- When brewing pour-over coffee or weighing objects above 55 degrees celsius, a silicone pad is recommended to prevent temperature fluctuations and protect the scale.
- Don't tilt or shake the scale, as this may trigger automatic shutdown.
- Place the scale on a hard & flat surface. Don't put objects over the maximum weight capacity, or it will cause permanent damage.
- Don't use it while charging for accuracy.
- Please clean the weighing surface after each use. Don't leave items on the plate for extended periods.
- If the battery has been idle for more than one month, make sure it has enough charge to prevent excessive drainage.
- Children under 12 are not allowed to use the scale.
- This product is not waterproof, please avoid soaking it in water.
- Please store the product in a dry, stable and non-corrosive environment.
